CLASSICAL IGUAZU FALLS

Classic trip to Iguazú Falls and the Devil's Gorge in Iguazú National Park. We could visit full moon waterfalls.

This Classic Iguazú Falls itinerary is the most traditional program. We recommend that travelers make this trip to visit the stunning Iguazú Falls in a few days, enjoying the Argentinean Falls — where we can have a close view— and the Brazilian Falls —where we can enjoy a dazzling panoramic view.

Then we will go by train to the marvelous and deafening Devil's Gorge, which will amaze us every minute with its natural sound. To end this trip to the Falls, we will get on semi-rigid inflatable boats and go as close as possible to San Martín Fall in the very center of the Argentinean Falls. This trip takes place 5 days a month during full moon, and two days before and after that. The capacity for this activity is limited and, of course, it depends on the weather conditions that day.

3 days - 2 nights

- ✓ Accommodation and breakfast- Double Room
- ✓ Transfer IN OUT APT/HTL/APT
- ✓ Regular Tours with Spanish & English Guide.
- ✓ Tickets to National Parks included

Itinerary

Buenos Aires – Iguazu

Reception at Ezeiza International Airport in Buenos Aires. Transfer to Domestic Airport (Buenos Aires). Reception and transfer from Iguazú Airport to the hotel.

Iguazú Falls & Big Adventure

We will do one of the most interesting excursions through the hanging bridges, which will lead us to visit the stunning Falls from the Argentine side. Then we will get to the Devil's Gorge and be dazzled by its rough waters, a nature spectacle at a height of 80 meters. In the Lower Area (Circuito Inferior) we will enjoy the rich wildlife around us, as we go down the flight of steps where we can watch the spectacle offered by this water curtain surrounded by thick vegetation.

We will pass by Álgar Núñez Fall, from where we will enjoy the first views of the Devil's Gorge. Following the path, we will find San Martín Island and the homonymous Fall. Finally, at the end of trip we will find Bosetti and Dos Hermanas Falls. We can stay and appreciate this spectacle of waters and get refreshed since the steam from the waves breaking on the rocks will spray us completely.

We will continue our trip, this time in the Upper Area (Circuito Superior), where we will go around

Argentinian Explorer

the same falls but from a different point of view of the Falls and their surroundings. Besides, we will get close to our next destination, the most stunning, which will guide us through the roaring of the water currents. We will get to the Devil's Gorge's station by train, and start our trip around the islands, and thus, have a wider view of this great nature "mistake" in the middle of the forest created, according to a legend, by the angry God of Iguazú River.

Big Adventure

This activity is an extra walk through the hanging bridges, and with this we will start our adventure in which we will sail up to the Canyon of Iguazú River. Then we will sail for about 2 km along the rapids enjoying a beautiful view from San Martín Island.

We will go round the island up to the homonymous fall to enjoy a great deal and get sprayed from a close distance. We will get back on off-road vehicles through the thick forest surrounding the National Park.

Iguazú Falls - Brazil

Here we will have a very beautiful trip through the only hanging bridge of 1 km to enjoy the view of Iguazú Falls from the other side, the Brazilian region. During this trip we can also learn more about the fauna and flora, enjoy a unique landscape of the falls since the area is more open regarding falls because most of them are on the Argentine side and form a water curtain of 2,700 meters wide.

So from this side we will be dazzled by the beauty of the Devil's Gorge to the full. Besides, this place is home to rare wildlife species, some of them in danger of extinction such as giant otters, anteaters, jaguars, red deer and yellow alligators. We will also see native flowers such as orchids, bromelias and thousands of butterflies. Transfer to Iguazú Airport. Reception at Domestic Airport (Buenos Aires). End of our services.

Note: We have to bear in mind that this trip is available only 5 days per month during the full moon; two days before, two days after, and during that period. We have also to take into consideration that the capacity for this activity is limited and, of course, it depends on the weather conditions that day.

Full Moon (optional in Argentine Falls)

We will enjoy this unique trip at night with a full moon, which will allow us to appreciate the sounds and secrets of Misiones forest. We will leave on the Ecologic Train and head for Devil's Gorge Station, where we will capture the first sounds of nature, which creates a magic and mysterious environment.

The spectacle offered by the Falls, with the rainbow that appears from the waters with the moon reflection, will completely dazzle us. Besides, once within this overwhelming environment, we will get the movements and sounds of the animals that go for their food. After such a magnificent experience, we will return by train to the travelers' center.
