

MISIONES FOREST

Doing quiet activities to better interpret the habitat of so many animal species such as mammals, reptiles and fish, among others.

We will go to this Lodge to learn about the ecosystem of the Mesopotamia region through typical activities like walking along the trails and around the reserve and watching birds and mammals, among others.

We can also go out on our own, walk along the paths of the Lodge or rest in the comfortable rooms waking up with the singing of the birds and going to sleep with the typical nighttime sounds.

Sailing and a photographic safari will be the best activities by far because we will see many species and have all the information provided by the specialized local guides who will help us turn this trip into a unique and once-in-a-lifetime experience.

We will have such wonderful experiences in a place tailored to the needs of the environment, surrounded by decorations and structures extracted from stones and big fallen trunks that give a natural and harmonious touch to the Lodge. We can enjoy specially the sound of the water coming from the springs up to the pool which will help us relax.

7 days - 6 nights

- ✓ Accommodation and breakfast Lunch and Dinner- Double Room
- ✓ Transfer IN OUT APT/HTL/APT
- ✓ Regular Tours with Spanish & English Guide.
- ✓ Tickets to National Parks included

Itinerary

Buenos Aires – Iguazu

Reception at Ezeiza International Airport in Buenos Aires. Transfer to Domestic Airport (Buenos Aires). Reception and transfer from Iguazú Airport the hotel.

Raíces Argentinas – Yacutinga Lodge – Entrance to the Lodge

In the afternoon, we will start our trip around nature, since we will leave from Raices Argentinas in Iguazú Port, crossing Urugua-Í National Park, which was created to protect the ecosystem in the homonymous region from the hydroelectric dam that affects it. Then we will change vehicles, and get on one suitable for highly attractive rural roads and go along 12 km up to Yacutinga wildlife Lodge.

This is a natural reserve of 570 hectares, aimed at the preservation of diverse autochthonous

wildlife species. In the lodge, we will reveal the secrets of Misiones forest, guided by the environment experts. We will walk along the interpretation trails in Yacutinga and learn about nature life. Also we will sail along Upper Iguazú River or San Francisco Stream.

We will be constantly aware of the protection of endangered species and the region, since this place is the habitat of delicate fauna that can only live in this natural environment. A perfect example of this is the big otter. Preservation and care of species is the biggest attraction for all who want to visit the reserve.

Yacutinga Lodge – Sailing and Safari

Our second day starts very early. We will sail the waters of San Francisco Stream, which is ideal for watching and taking photographs of a large number of birds, fish and some mammals; among them we can see rufescent tiger-herons, elusive ipequis, greater anis, swallow-tailed manakins, white-browed foliage gleaners, white-winged swallows and neotropical river warblers.

During three hours, we will be floating in the stream in utter silence, as a sign of respect to the surrounding nature, which should remain intact. We will be surprised by this spectacular forest area, while listening to the clear explanations of the guides and the surrounding noise.

At midday, we will go back to the Lodge to have lunch and get ready for the next trip. Later, we will have time to walk along the interpretation trails on our own or just rest in the Lodge. Then, we will take an interpretation walk accompanied by our specialized guides, who will inform us about varied environments and autochthonous flora and fauna of Misiones forest.

Yacutinga Lodge – Raíces Argentinas

We will have breakfast at the Lodge and have time to rest in the facilities provided. To take more advantage of the stay there, we can stroll around the interpretation trails, a place where it is frequent to see species such as brown tinamous, solitary tinamous, grey-fronted doves, ochre-collared piculets, Chikli spinetails, rufous-breasted leafscrapers, rufous-capped spinetails, rufous gnateaters, white throated spadebills, and even more difficult to see, small-billed tinamous, among others.

On these three days we will have learnt to respect natural life and treat it as it deserves, with no harm, as these species are at risk due to man's actions. We will have fond memories of all the animals and vegetation seen. At midday, we will go to Raíces Argentinas to go back then to Iguazú Port. We will have the evening off in this city.

Iguazú Falls & Big Adventure

We will do one of the most interesting excursions through the hanging bridges, which will lead us to visit the stunning Falls from the Argentine side. Then we will get to the Devil's Gorge and be dazzled by its rough waters, a nature spectacles at a height of 80 meters. In the Lower Area (Circuito Inferior) we will enjoy the rich wildlife around us, as we go down the flight of steps where we can watch the spectacle offered by this water curtain surrounded by thick vegetation.

We will pass by Álvar Núñez Fall, from where we will enjoy the first views of the Devil's Gorge. Following the path, we will find San Martín Island and the homonymous Fall. Finally, at the end of trip we will find Bosetti and Dos Hermanas Falls. We can stay and appreciate this spectacle of waters and get refreshed since the steam from the waves breaking on the rocks will spray us completely.

We will continue our trip, this time in the Upper Area (Circuito Superior), where we will go around the same falls but from a different point of view of the Falls and their surroundings. Besides, we

will get close to our next destination, the most stunning, which will guide us through the roaring of the water currents. We will get to the Devil's Gorge's station by train, and start our trip around the islands, and thus, have a wider view of this great nature "mistake" in the middle of the forest created, according to a legend, by the angry God of Iguazú River.

Big Adventure

This activity is an extra walk through the hanging bridges, and with this we will start our adventure in which we will sail up to the Canyon of Iguazú River. Then we will sail for about 2 km along the rapids enjoying a beautiful view from San Martín Island.

We will go round the island up to the homonymous fall to enjoy a great deal and get sprayed from a close distance. We will get back on off-road vehicles through the thick forest surrounding the National Park.

Iguazú Falls - Brazil

Here we will have a very beautiful trip through the only hanging bridge of 1 km to enjoy the view of Iguazú Falls from the other side, the Brazilian region. During this trip we can also learn more about the fauna and flora, enjoy a unique landscape of the falls since the area is more open regarding falls because most of them are on the Argentine side and form a water curtain of 2,700 meters wide.

So from this side we will be dazzled by the beauty of the Devil's Gorge to the full. Besides, this place is home to rare wildlife species, some of them in danger of extinction such as giant otters, anteaters, jaguars, red deer and yellow alligators. We will also see native flowers such as orchids, bromelias and thousands of butterflies. Transfer to Iguazú Airport. Reception at Domestic Airport (Buenos Aires) and transfert to the hotel.

Buenos Aires

Breakfast at the Hotel. Transfer to Iguazu Airport. Reception and transfer from domestic airport (Buenos Aires) to Ezeiza International Airport in Buenos Aires. End of our services.
